

...Protecting what matters to you

CORPORATE PROFILE

2019

Our Business

Our Mission

We want to offer convenience to our target market by providing them with functional, innovative and affordable solutions.

Our Vision

We seek to become a market leader in delivering monitoring, safety, security, surveillance and control technology solutions in West Africa.

Core Values

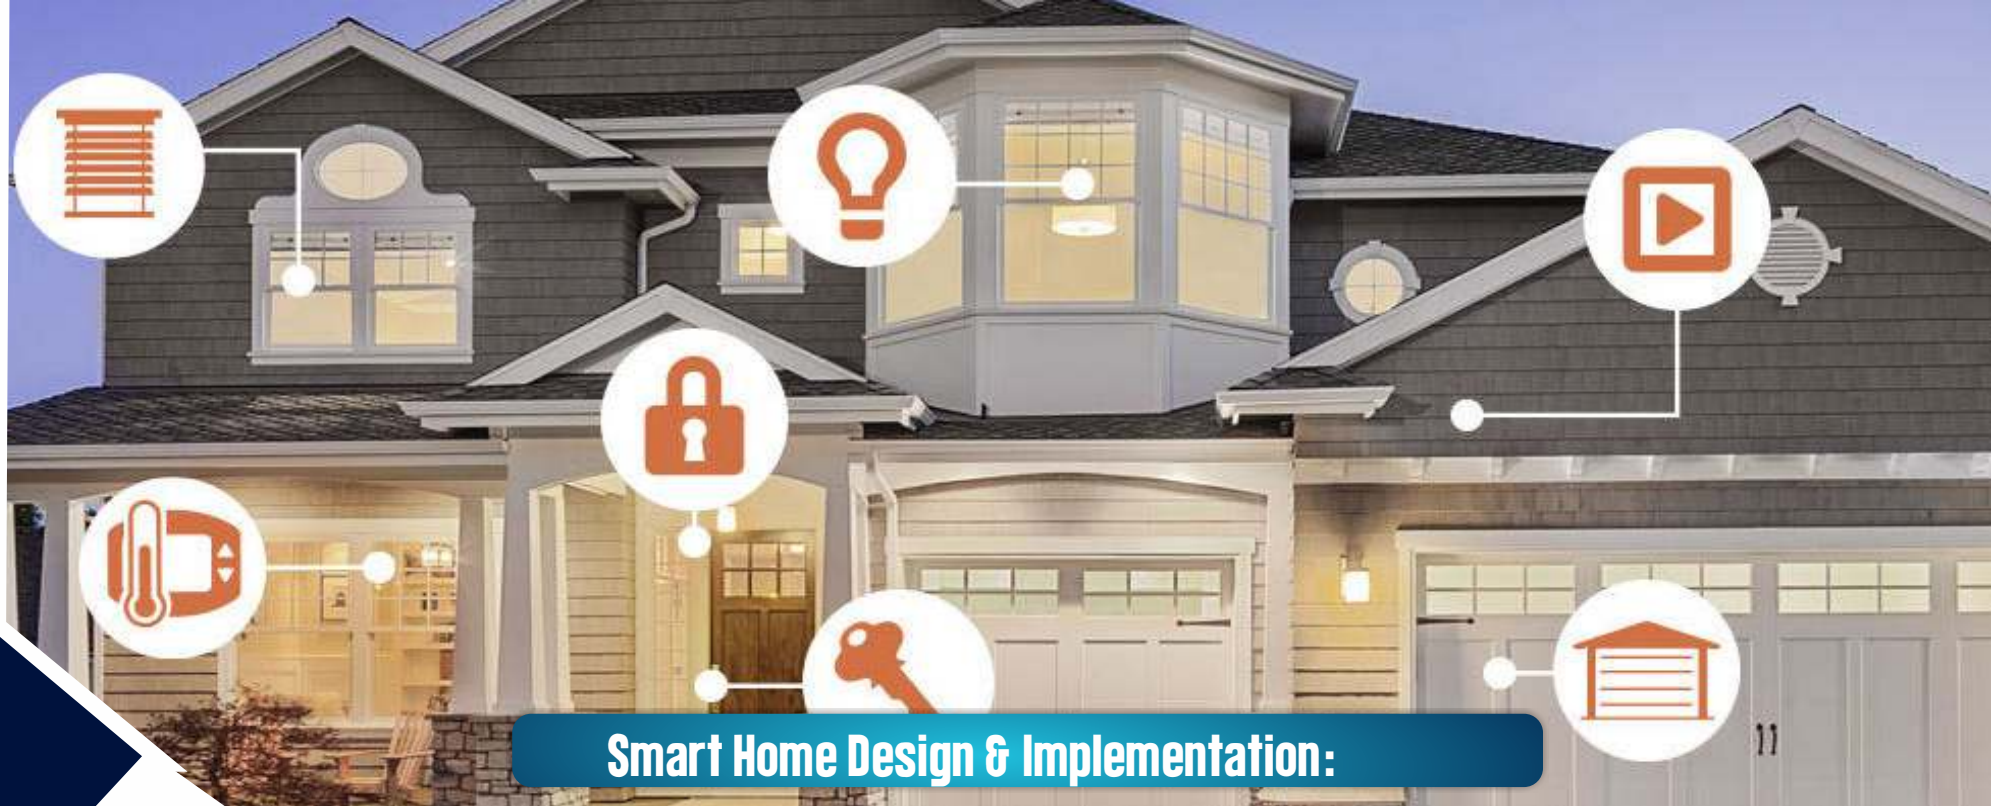

Innovation
Integrity
Cost Saving
Customer Satisfaction

Close-Guard Technology is a Nigeria-based information technology outfit with focus on providing innovative technology solutions in the areas of monitoring, safety, security, surveillance and access-control.

Close-Guard Technology was founded in August 2018 by a group of creative Nigerians, who share a common vision of offering world-class, yet affordable technological innovations to the local market.

Through global partnerships and strategic alliance, Close-Guard Technology is able to research, design, develop and deliver ingenious products and services to its target market at very competitive rates.

Smart Home Design & Implementation:

Imagine being able to control every single aspect of your home from one smart device!

From automation to monitoring, control and safety, our smart home solutions offer convenient and easy ways to manage your home, office, hotel, hospital and just about any type of building from any part of the world through our smart app.

With our smart home solutions, you can completely automate every aspect of your building, including access gates, perimeter fence, entrance doors, windows, lighting, electricals, utilities, safety and lots more.

Our smart home offerings include;

- Automatic Gate with Remote Control
- Smart Perimeter Fence and Defense
- Intruder Detection and Alert Systems
- Burglary Detection and Alert Systems
- Smart Fire, Smoke and Co2 Alert Systems
- Smart Motion Activated Surveillance Systems
- Automatic Light Control Switches
- Smart Temperature and Humidity Monitoring Systems
- Automatic Door Lock and Access Controls (password/biometric Unlock)
- Automatic Door Bells
- Automatic Climate Control System
- Smart Remote Control Systems For Appliance

Smart Surveillance System Design & Implementation:

Surveillance shouldn't be just about watching pre-recorded videos from CCTVs and that is where our technology comes in.

With our smart surveillance systems, you are able to monitor precisely what matters, where it mattered and when it mattered, making sure that no penny is wasted on unnecessary recordings.

Our smart surveillance systems are equipped with motion-activated recording, high-definition imaging, night-vision technology and remote monitoring & control capability to enable you access video feeds of your properties from any part of the world.

Our surveillance systems can be used for both in-door and out-door monitoring.

Our smart surveillance offerings include;

- Smart CCTV Systems with Remote Viewing and Control
- Nanny Cams with Remote Viewing
- Hidden / Spy Cameras
- Smart Dash-cams for Vehicles

Smart Security System Design & Implementation:

Ever wondered the possibility of completely automating your security? We have the perfect solution for you.

Our smart security systems offers a completely man-less security solution for residential and commercial buildings.

With our smart security systems, you are able to monitor, restrict as well as control access to your property from any part of the world.

Our smart security offerings include;

- Automated Access Control
- Ntrusion Alert Systems
- Remote Surveillance and Monitoring Systems
- Smart Burglary Detectors and Alert Systems for Doors & Windows
- Smart/invisible Perimeter Fence

Vehicle Tracking Service:

From real-time location to tracking, monitoring and remote control, our innovative yet affordable car tracking solutions offer set of tools to enable you take total control of all your vehicles/fleets.

Our vehicle tracking solution offer you Real-time location, Vehicle status notification, Location history, Remote Panic, Remote Demobilization, Car Battery Disconnect Alert and Geo-Fencing features, amongst others.

We offer you multiple tracking platforms for convenience, including SMS, Call, Web Portal, RESTFull API, Custom Protocol and Mobile App.

We also offer a 24/7 call-to-located and SOS services in the case of emergency

Valubles & Pets Tracking Service:

Whether you want to keep track of the location of your baggage, pet, family member or just about anything, we have just the right tracking solution for you.

Our valuables & pets tracking solution offers set of tools and features to monitor the real-time location of your valuables as well as detailed location history, all at your finger tip.

We offer you multiple tracking platforms for convenience, including SMS, Call, Web Portal and Mobile App.

White-Label Tracking Solution:

We offer white-label tracking solution that allows you to build your own tracking services or platform using our APIs at no extra cost.

With our white-label tracking solution, you will be able to access, monitor and control any device listed under your account from your own application without the need for a specialized expensive tracking infrastructure. You simply make a secured request to our RESTful API to get any information you need.

Our White-Label tracking solution can be used by Fleet Management Companies, Insurance Companies, Government Agencies, Large Organizations and any business with large number or fleet, seeking personalized tracking solution.

On-Demand Tracking

Whether you want to track a human, animal, money-bag or just about anything. We have the right tool to do the job.

Our special-purpose tracking devices are self-powered upto 72 hours, giving you real-time information on the position of your belonging.

We also offer incognito (hidden) tracking devices that are hard to detect. We can camouflage the tracking device to make it even harder to find.

We offer you multiple tracking platforms for convenience, including SMS, Call, Web Portal and Mobile App.
